Professional Summary

I am a junior developer with strong foundations in data science. I have worked as a software engineer (AI training) for Outlier AI where I reviewed, revised and categorised code for training Language Learning models.

I then took on a contractual role as frontend developer for the Ecommerce company Electrobit SA.

My portfolio website is attached to illustrate projects I have undertaken.

I am confident in my ability to adapt and pick up new skills to complete any assignment I am tasked with.

Experience

Outlier AI February 2023- December 2023

Software Engineer for AI training Remote

- Debugged code generated by clientele AI prompts
- Reviewed, revised and annotated programming solutions generated by Language Learning Model
- Matched and ranked AI prompts with appropriate code solutions
- Categorised and prepared prompt/code pairs into training data for Language Learning Models

Electrobit SA January 2024- March 2025

Junior Frontend Developer Edenvale, Gauteng

https://www.elektrobitsa.com

Skills

Programming Languages

Python, C, Javascript

Fullstack Development

Django, NodeJS, REST APIs, ExpressJs

Frontend Development

REACTJS, HTML, BOOTSTRAP 5, CSS, Figma

Machine Learning

Scikit Learn, Statsmodels

Artificial Intelligence

Deep Learning, Pytorch, Tensorflow

Database Services

AWS RDS, MongoDB, Cloudinary, MySQL

Teamwork

Decision-making, Adaptability and Flexibility, Self motivated, Active Listening, Excellent Interpersonal Communication

Certifications

IBM AI Engineering Professional Certificate

IBM (via Coursera) May 2023

Credentials

Quantitative Analytics

Deep Learning (Tensorflow and Pytorch)

Machine Learning (Scikit Learn and Statsmodels)

Computer Vision

SQL
